Career Summary

I'm a full-stack engineer who builds and ships products end-to-end from idea to live users. I built HireJourney, an AI career platform now used by 50+ job seekers across Nigeria and beyond, handling everything from backend architecture to payments to AI orchestration. Alongside it, I've worked in team environments shipping production systems, independently built a full e-commerce platform and an AI-driven crypto trading bot that pulls live market data and news to generate real trading signals with LLMs, and delivered Flutter mobile apps for fintech and healthcare clients. I work across React, TypeScript, FastAPI, PostgreSQL, Redis, and Flutter, and I'm most in my element owning a system end-to-end architecture, infrastructure, payments, AI and getting it in front of real users fast.

Core Competencies

Backend: Python (FastAPI, Django, Flask), Java (Spring Boot), Node.js.

Frontend: React, Next.js, Vite, TailwindCSS, TypeScript

Mobile: Flutter (Android & iOS)

AI / ML: LLM Integration, OpenRouter, TensorFlow, AssemblyAI, YAMNet

Cloud / DevOps: Docker, Firebase, Render, Fly.io, Vercel, Cloudflare.

Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase.

ORM: Drizzle, SQLAlchemy.

Testing & Security: JUnit, Pytest, Jest, JWT, OAuth2, Spring Security.

Tools: Git, Postman, Swagger, GitHub.

Professional Experience

HireJourney - hirejourney.xyz

Lagos, Nigeria

Full-Stack Software Engineer

Oct 2025 - Present

Built and shipped a full-stack AI-powered career platform solo from zero to live users across Nigeria and internationally.

- Engineered and maintained 40+ production-grade RESTful APIs with FastAPI powering authentication, ATS analysis, resume processing, job tracking, interview simulation, and cover letter generation across web and Chrome extension clients.
- Designed scalable authentication architecture with JWT access/refresh token rotation, Redis-backed token blacklisting via Upstash, session management, and rate limiting for secure concurrent user access
- Built asynchronous AI orchestration pipelines integrating OpenRouter LLM APIs for job fit scoring, ATS analysis, and dynamic interview generation tailored to specific job descriptions
- Processed and analyzed 1,000+ resumes and generated 1,500+ ATS reports through optimized backend pipelines, concurrent request handling, and database query optimization
- Implemented Redis caching strategies, PostgreSQL indexing, and rate limiting to reduce API latency and improve backend reliability under concurrent usage
- Architected async background processing workflows for AI analysis, PDF generation, and report exports using non-blocking worker-style processing patterns
- Shipped a Chrome Extension enabling one-click extraction of job descriptions from job boards directly into AI analysis pipelines
- Built and deployed Dockerized backend infrastructure on Fly.io and frontend infrastructure on Vercel with automated CI/CD pipelines and production deployment workflows
- Implemented dual payment infrastructure with Paystack and Lemon Squeezy including automatic IP-based routing, webhook handling, and international checkout support
- Documented backend services with Swagger/OpenAPI specifications, maintaining comprehensive API references across the platform.

Meerge Africa

Lagos, Nigeria (Remote)

Backend Developer

May 2025 - June 2025

Backend engineer responsible for building and scaling APIs for a logistics and payment platform supporting delivery agents and financial transactions.

- Built and maintained 15+ RESTful APIs for orders, payments, and KYC verification.

- Integrated Paystack API with custom failover logic enabled 99.9% transaction success rate.
- Reduced DB query latency by 30% using indexing and Redis caching.
- Designed OTP verification (email/SMS) with 100% delivery rate.
- Wrote automated tests (Pytest/Postman) and set up CI/CD to keep features stable while moving fast.

3rbe

London, United Kingdom (Remote)

Mobile Developer Intern

February 2025 - April 2025

Worked on a cross-platform fintech mobile application focused on performance and usability.

- Improved image upload performance by 30%, reducing loading time and improving user experience.
- Fixed layout bugs and inconsistencies, improving UI compatibility across 95%+ of supported devices.
- Worked closely with the mobile engineering team in agile sprints to ship customer-facing features.
- Consumed and integrated backend APIs for user authentication, transactions, and profile management.

Semicolon Africa

Lagos, Nigeria

Software Engineering Fellow

February 2024 - February 2025

Built backend systems and APIs for multiple web and mobile products in a collaborative engineering environment.

- Designed and implemented backend architectures for 4+ production applications.
- Led development sprints and code reviews improving code quality across teams.
- Built REST APIs powering web and mobile applications.
- Implemented automated testing pipelines improving system reliability.

Freelance Full-Stack Developer | Self-Employed

January 2023 – Present

Delivered end-to-end software solutions for international clients across lifestyle, e-commerce, and personal branding sectors, focusing on scalability, usability, and performance.

- Developed booking platforms for UK-based beauty professionals, increasing appointment conversions and contributing to ~40% revenue growth.
- Built a TreeLink-style creator portfolio platform generating 200+ monthly visits.
- Designed and deployed scalable backend APIs supporting mobile and web applications.
- Built core screens and features for a Flutter-based fintech loan app under NDA, integrating Smile ID for KYC and Paystack for in-app repayments, and connecting the full loan flow (application, disbursement, repayment) to backend APIs.
- Built the frontend for a Flutter-based healthcare mobile app under NDA, translating Figma designs into a fully responsive UI.

Selected Projects

HireJourney - AI Career Platform - [Live](#)

AI-powered career platform helping job seekers optimize resumes, analyze job fit, prepare for personalized interviews, and track applications.

Tech-Stack: FastAPI, React, Typescript, PostgreSQL, Redis, OpenRouter, LLM API, Paystack, Lemon Squeezy.

HireJourney - AI Career Platform - [Live](#)

AI-powered career platform helping job seekers optimize resumes, analyze job fit, prepare for personalized interviews, and track applications.

Tech-Stack: FastAPI, React, Typescript, PostgreSQL, Redis, OpenRouter, LLM API, Paystack, Lemon Squeezy.

CommsBridge – AI Assistive Mobile App - [GitHub](#)

AI-powered application designed to help hearing-impaired users understand conversations and detect environmental hazards. I implemented speech-to-text transcription, multilingual translation, and AI summarization, improved audio processing pipeline achieving 40% faster processing.

Tech-Stack: Java, Spring Boot, Flutter, Python, FastAPI, TensorFlow, Gemini, Cloudinary, MySQL.

Shoe-store E-commerce Platform - [Live](#)

Full-stack e-commerce platform for a shoe retailer with customer storefront and admin dashboard for inventory, order, and product management.

Tech-Stack: Next.js, TypeScript, NeonDB, Drizzle ORM, Cloudinary, Paystack..

Crypto Signal Bot - Telegram

Automated trading signal bot combining technical and fundamental analysis, ingesting live market news and delivering real-time signals via a Telegram bot interface.

Tech-Stack: Python, FastAPI, Pandas, CoinGecko API, Binance Funding API, ForexFactory, CoinTelegraph, CoinDesk, OpenRouter(Claude), Redis, NeonDB, Docker, Flyio.

Fabhands - [LiveDemo](#).

Link-in-bio & Booking Platform for a Freelance Artist

- *Designed and built a streamlined link-in-bio site with integrated booking and digital brochure for a real freelance makeup artist.*
- *Reduced repetitive price and booking enquiries by centralising all client touchpoints in one place.*

Education/Certification

Lagos State University - B.Sc. in Business Administration	Lagos State, Nigeria
Henley Business School - Business Management Certificate	Greenlands, United Kingdom Completed May 2025
